

Risk Assessment, Rain 01/12/2021

Inflatable play equipment

We hope you have a great day and enjoy your event in the safest possible way!

Please be aware that there is some heavy rain showers forecast this weekend. Please check your local weather <https://www.bbc.co.uk/weather>

As soon as you see a rain down pour start, you must:

1. Remove the children from the inflatable right away.
2. Remove the plug from the power source.
3. Cover the blower with the waterproof cover provided.
4. Remove the extension cable from the rain, and keep any other electrics dry.

When the rain subsides, you will then be able to remove the waterproof cover from the blower and plug the extension cable in. You can dry the castle off with an old towel or leave it to dry in the open air.

Please also be aware of wind speeds and switch off your inflatable if wind speeds are in excess of 15 mph.

Please keep extra attention to this weather notice. If you are unsure at any point, about anything, turn off the equipment and call 07515695973.

Many thanks

Alison Weir
